

Capabilities Statement

Mission

To develop, deploy, and deliver a full array of creative intelligence, security, analysis, and training solutions across the nation and around the world.

Core Competencies

Education & Training:

Full spectrum of tailored education and training programs leveraging creative approaches to learning both in virtual and traditional settings

Analysis & Assessments:

Integrating and synchronizing intelligence, plans, and operations – providing technical assessments, analytics, and tested solutions to complex operational challenges to intelligence, military, and law enforcement

Global Reach:

Planning, coordinating and executing global events, deployments, and education venues to enhance cooperative mission effectiveness

Information Technology:

Tools used for gleaning big data to find critical information; fusing technology with human cognition; includes large logistics database support and avionics software testing

Past Performance

Delivering tailored, dynamic, professional information operations and education along with intelligence and cyber training courses incorporating real world practical exercises

- World class education, political, international exchange forums and global logistical planning success
- Premier online training and professional developmental portal serving more than 10,000 ISR professionals
- Expert analysis, collection and ISR management support for: DoD, theater operations, integrated intelligence activities, sensitive operations, and plans development
- Unique technical program support and engineering assessments provided to DOD senior executives guided national priority research programs
- Thought leadership exemplified with senior defense executive studies, assessments, and future plans
